WHAT THIS MEANS

PCWorld's Link Health Score of 60/100 is based on a modest 16 affiliate links, of which 3 unique links are broken (appearing 4 times), 2 are unavailable, and 7 show limited regional availability. Twelve Amazon-linked videos are tied to a single region with no multi-market redirect. The flagged videos account for a small 2.8% share of the channel's total views, so while fixing the broken and unavailable links could offer some commission opportunity, the current exposure is limited.

HOW AFFILIO HELPS

1 DEAD LINKS

5 broken or unavailable links detected

Each of these links loses you commission every time it's clicked instead of converting. Affilio re-checks your link inventory for new breakages (every 30 days on Free, 14 on Boost, 7 on Professional) and puts the moment one goes bad at the top of this list — so you swap in a working link while the video is still earning, instead of hunting for it months later.

2 GLOBAL LINKS

12 videos linked to one Amazon region

None of the 12 Amazon videos route international viewers to their local marketplace. Affilio's Professional plan routes each viewer to their own local Amazon marketplace automatically — set it up once per link, and every future click routes correctly on its own.

3 UNTAGGED LINK

1 raw Amazon link

A bare Amazon link with no affiliate tag earns you nothing, even when it converts — the click still converts, the commission just goes to whoever's tag is on the link. Swap in a tagged link and the same video starts earning again.
