UNAVAILABLE LINKS

item out of stock

WHAT THIS MEANS

The report shows a Link Health Score of 76 out of 100, indicating a good overall health, but room for improvement. Of the 39 affiliate links found, 1 is unavailable due to page loads or items being out of stock, and 25 are available in some but not all regions. Additionally, 16 of these links are tagged as Amazon affiliate links and 13 are linked to a single Amazon region without multi-market redirect, which may result in commission loss on non-US purchases from international viewers since the channel's Amazon storefront does not support OneLink.

HOW AFFILIO HELPS

1 DEAD LINKS

1 broken or unavailable link detected

Each of these links loses you commission every time it's clicked instead of converting. Affilio re-checks your link inventory for new breakages (every 30 days on Free, 14 on Boost, 7 on Professional) and puts the moment one goes bad at the top of this list — so you swap in a working link while the video is still earning, instead of hunting for it months later.

2 GLOBAL LINKS

13 videos linked to one Amazon region

None of the 13 Amazon videos route international viewers to their local marketplace. Affilio's Professional plan routes each viewer to their own local Amazon marketplace automatically — set it up once per link, and every future click routes correctly on its own.

3 GLOBAL STORE

Amazon store isn't geo-redirected

Your Amazon storefront link doesn't support OneLink, so every international visitor is sent to the US store — and you lose the commission on their purchase. On the Professional plan you set the regional targets once, and Affilio then routes each viewer to their local Amazon marketplace from then on.
