RAW AMAZON LINKS

4

missing affiliate tag

WHAT THIS MEANS

Millie, a critical issue has been identified in your affiliate links, with a Link Health Score of just 50/100, indicating significant room for improvement. The 2.1% of your total views currently landing on flagged videos represents a notable loss of commissions, not to mention the 4 raw Amazon links found without proper tagging, including 2 videos linked to a single Amazon region which may limit your international earning potential. Furthermore, your existing Amazon storefront does not support OneLink, resulting in lost commissions on non-US purchases. Addressing these issues directly compounds into recovered commission without the need for new content.

HOW AFFILIO HELPS

1GLOBAL LINKS

2 videos linked to one Amazon region

None of the 2 Amazon videos route international viewers to their local marketplace. Affilio's region-aware routing sends each viewer to their own local Amazon marketplace automatically — set it up once per link, and every future click routes correctly on its own.

2AUTO-TAG

4 raw Amazon links

A bare amazon.com link with no affiliate tag earns you nothing, even when it converts. Affilio auto-wraps links like these with your affiliate tag before the click leaves the page, so nothing slips through untagged.

3GLOBAL STORE

Amazon store isn't geo-redirected

Your Amazon storefront link doesn't support OneLink, so every international visitor is sent to the US store — and you lose the commission on their purchase. Affilio routes each viewer to their local Amazon marketplace automatically, the same way it does for individual product links.
